

Traffic Crashes: A Public Health Problem

*Figure 1: Average Number of Deaths and Injuries Per Year to Motor Vehicle Crash Occupants, Nebraska, 2006-2010.

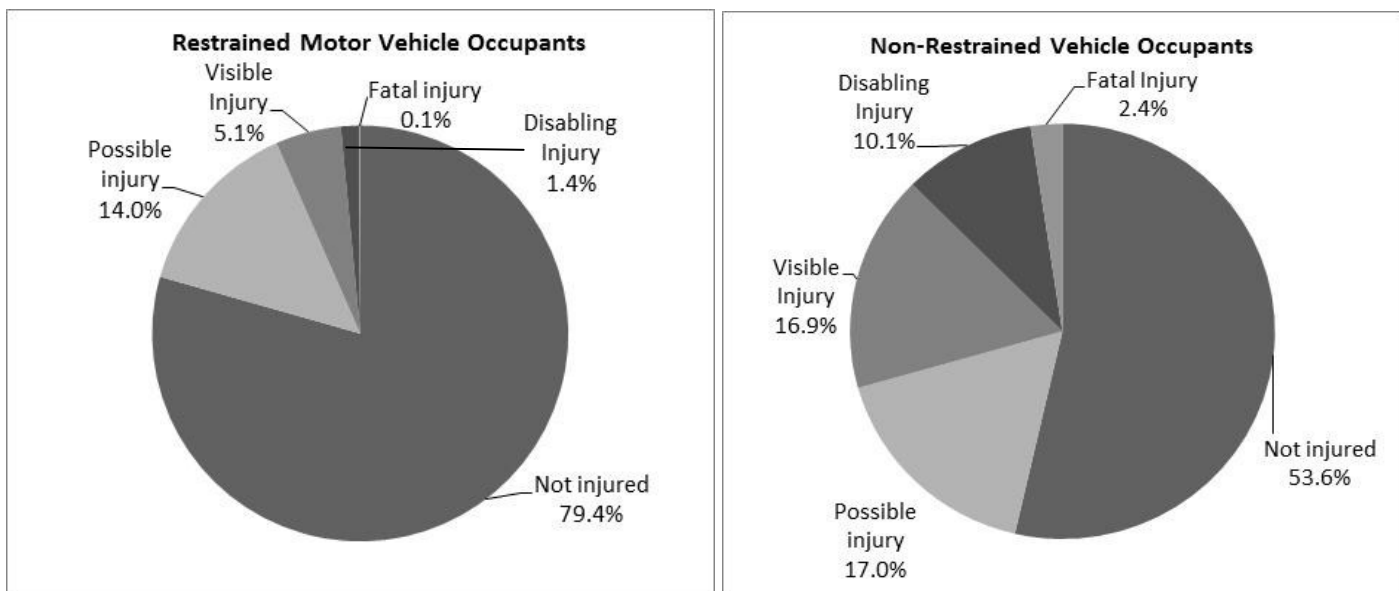

On average in Nebraska:

- One crash occurs every 17 minutes.
- 39 persons injured each day (figure 1).
- One person is killed every 48 hours (figure 1).

In 2010, an estimated 72 lives were saved by seat belts in Nebraska. A total of 29 more lives could have been saved if seat belt use was at 100%. (Source: NHTSA)
